Target version:			
Description			
QtCreator uses ptrace(), which is available only in 32-bit libc.			
ptrace() on Solaris is a library function (e. i. not a system call), which is implemented through /proc filesystem.			
Either port 32-bit ptrace() to 64-bit, or patch QtCreator to use /proc.			

History

#1 - 2013-09-15 10:51 AM - Igor Pashev

- Subject changed from *QtCreator need an ptrace implementation* to *QtCreator needs a ptrace implementation*

#2 - 2014-06-18 08:46 PM - Igor Pashev

- Priority changed from *Normal* to *Low*
